OUR AVAILABLE SURVEYS, TRAININGS, AND ASSESSMENTS:

Job Hazard Assessment and Workplace Safety Survey	Perform a thorough evaluation of job hazards to establish a secure work environment. This assessment aids in averting OSHA and EPA violations, minimizing workers' compensation claims, and decreasing insurance premiums.
Ergonomic Assessment	Examining methods to enhance ergonomics within the facility to achieve outcomes like improved worker comfort, lowered insurance costs, and enhanced worker productivity.
Ladder Safety Training	Ensure adherence to proper procedures by informing team members about relevant regulations and delivering training on the correct usage and inspection of ladders.
Fall Protection Training	Empowers workers with crucial knowledge and skills to prevent falls and uphold a secure working environment at elevated heights.
Ladder and Fall Hazard Assessment	Perform a thorough assessment of ladder inventory, reviewing OSHA compliance for each ladder. Additionally, analyze roofs and mezzanines to ensure safety, security, and ease of use/navigation in accordance with OSHA standards.
SIGHT+ Survey	Signs, ID's, GHS, Hazards, & Tags. Evaluate the existing safety and compliance signage and labeling, providing recommendations for enhancement.
Chemical Safety Storage Assessment	Assess and guarantee the appropriate handling, containment, and storage of hazardous substances to minimize potential risks and uphold a safe working environment.
Spill Control Survey	Evaluate the current spill control program and provide recommendations for spill products based on location and type of spill. Additionally, suggest appropriate absorbents for water-based, oil, and chemical liquids.
Arc Flash Compliance and Awareness Assessment	Conduct a review of the existing arc flash program, training, labeling, and provide an overview of arc flash regulations and best practices.
PPE Assessment	By implementing a 5-step program, including PPE assessment and application-specific training, we ensure that employees are equipped with the suitable Personal Protective Equipment, thereby enhancing their overall safety.
Predictive Maintenance Seminar	Provide an overview of acoustic and thermal imaging, vibration analysis, insulation resistance testing, and process calibration, along with general best practices.
Safety Knife Audit	Review applications and hazards encountered in workflow around cutting. Assess proper safety cutter for each area and job in the facility.
